Real World Assets

Presented by **Agric Real
World Assets**

AgricRealWorldAssets.com

What it means

Agricultural real-world assets are things like farmland, crops, equipment, and carbon credits, royalty shares, that are turned into digital tokens representing ownership, revenue rights, or usage rights. These tokens can be traded, sold, or used as collateral in digital markets while still being backed by real farms.

Tokenized **Real World Assets (RWA)** market is projected to grow by 16 trillion by 2030 This is driven by institutional adoption from firms like BlackRock and JPMorgan, focusing on tokenizing treasury bills, private equity, and real estate for better liquidity and efficiency.

16 TRILLION BY
2030

✓ **A Ethereum Smart Contract**

is a small program that lives at an address on the Ethereum blockchain and runs exactly as written when it is triggered by a transaction.

✓ **NFT stands for “non-fungible token.”**

It means a unique digital token on a blockchain that is used to prove authenticity and ownership of a specific digital or real-world asset, and it cannot be copied, substituted, or split into interchangeable units like regular cryptocurrency coins.

Royalties Sharing Program

is a 100% decentralized, Ethereum-based NFT revenue-sharing platform designed to reward users with predictable returns while offering liquidity and resale opportunities through a dedicated marketplace.

 AgricRealWorldAssets.com

How it Works

Limited Supply Only 25,000 NFTs will ever be minted, creating scarcity, You can use any **web3 wallet**.

Profit Source: Profits are distributed from 4usfarms.com operational royalties shared among NFT holders based on the number they own.

You can mint NFT with any **web3 wallet**.

PRICE STARTS AT
